To The Point About The Safe Operation of Powered Pallet Jacks
REVIEW QUIZ

Name _____ Date _____

The following questions are provided to determine how well you understand the information presented in this program.

1. During the pre-operational inspection, make a circle around the vehicle, looking for any fluid leaks, cracked or bent parts, or any other damage.
 - a. True
 - b. False

2. To protect your feet, you should wear steel-toed footwear. Broken bones can occur when feet are struck by falling loads or run over by a tire or wheel.
 - a. True
 - b. False

3. When pressure is applied to the reverse switch on the T-bar, the unit will move toward the operator.
 - a. True
 - b. False

4. The preferred operating orientation is to walk ahead of the truck and to the side, with the forks trailing. This requires one handed operation.
 - a. True
 - b. False

5. Before lifting a load, make sure it doesn't exceed your truck's capacity.
 - a. True
 - b. False

6. Once you have reached your destination, make sure to come to a complete stop before lowering the pallet.
 - a. True
 - b. False

7. You must also be aware of other work vehicles traveling in your work area. Always maintain a two-vehicle length distance from other vehicles.
 - a. True
 - b. False

8. Never turn or travel at an angle on an incline. Only travel straight up or straight down an incline.
 - a. True
 - b. False

9. All bridge plates and dock boards do not have to be inspected before use.
 - a. True
 - b. False

10. When parking a powered pallet jack, only park it in approved areas. Never park the vehicle in aisleways or in front of doors, stairs, exits or emergency equipment.
 - a. True
 - b. False
